deaf, hard of hearing and speech disabled. Hearing people who do not have TDD
equipment can call this number to connect with a person who uses a TDD.

* Cardinal Point Business Services
    1323 Tumbleweed Way
    Sacramento CA 95834
    Phone: (916) 564-1210
Our experienced I.T. consultant team specializes in using adaptive technology software
and hardware for blind and low vision candidates. Our approach is comprehensive, and
begins with identifying the needs and available technology choices. There is usually a
small testing phase to identify the probable choices and solutions in the context of what
equipment and software will be used in the work environment. We create a work plan for
various approvals, which can include purchase of software and hardware, development of
customized software scripts, delivery and installation, configuration, training and support.
While we often shield the end-user from some of the technical issues, we engage them in
the creation of the training plan. Our approach to training is individual and usually tiered.
We assemble the training and assistance according to needs and usually perform it with
an initial orientation and a few follow-up sessions.

* CAPTEK, INC. (Science Products Co.)
    P.O. Box 888
    Southeastern, PA 19399
    Phone: (800) 888-7401 or (610) 296-2111

* Dancing Dots
        1754 Quarry Lane
        PO Box 927
        Valley Forge, PA 19482-0927
        Phone: (610) 783-6692
Founded by a blind musician and programmer, Dancing Dots (DD) helps blind people make music with the computer. DD released the GOODFEEL(r) Braille Music Translator in 1997. Meantime, the company has expanded its focus to enabling blind musicians to independently record, edit and print out their musical ideas. Their CakeTalking product customizes the JAWS screen reader to give the blind user the highest level of access ever to Cakewalk, mainstream software which converts a PC into a Digital recording studio. DD distributes a wide range of assistive technology and music products to blind and sighted customers throughout the world. With GOODFEEL(r) combined with some mainstream software, any sighted musician can prepare a braille score without needing to be a braille music specialist. Blind users can make sound recordings and print and braille editions with Cakewalk and CakeTalking. Music scanning software can be used to speed data entry. Consultation and training services available. See www.dancingdots.com.

* DCARA Products Store
        568 Parrott St.

      8501 Delport Dr.
      St. Louis, MO 63114-5905
      Phone: 800-560-7226
Vision Technology Inc. manufactures Freedom Machines which are innovative systems for individuals with low vision. The systems help these individuals read, write and live independently. The Vision Excel B&W and Color CCTVs include a number of firsts: all controls on easy to read backlit front panel, large, soft-touch button controls; digital Zoom, Contrast and Mode buttons. The Vision Excel has a welded steel frame and 1/8 inch aircraft aluminum X-Y Table that is both stable and durable. The MousCann Freedom Machines come in Color or B & W. Each has features unavailable in other hand-held magnifiers including, a guide tray, patented writing stand and carrying case. The "Link" is a most effective way to integrate any Freedom Machine with a PC. With the "Link" you can have a full screen view of either the CCTV or the computer software.

* Vision Technology of Los Angeles
      2337 Roscomare Road, #2-126
      Los Angeles, CA 90077
      Phone: 310-471-7051
Vision Technology of Los Angeles, coordinated by Wendy Morris, provides innovative Freedom Machines for individuals with low vision in the Southern California area. The exciting new Auto Focus Color Vision Excel CCTV combines ease of use, crystal clear

optics and affordability. The freeze frame feature allows the item being viewed to be removed from the movable tray while the image remains displayed on the monitor. The handheld MousCam CCTV systems offer features previously unavailable, such as a writing stand as well as a guide tray to stabilize the camera and simplify reading across the page. In association with Team Computer we are pleased to offer computer products and training to the visually impaired. Zoomtext, Jaws and business software are combined with large monitors and appropriate computer power. Training is provided to the extent requested by the counselor.

* Zephyr-TEC Corp.
        1660 South Amphlett Blvd., Suite 116
        San Mateo, CA 94402
        Phone: (650) 655-2405
Founded in 1993, Zephyr-TEC provides sales, installation, training, integration, customization and technical support of the latest speech recognition software available. We also provide in-depth analysis and evaluations of the viability of using speech recognition in a particular job or with a custom or mainframe application. We specialize in Dragon NaturallySpeaking but can work with other packages (ViaVoice, Voice Xpress, Microsoft Speech). Our instructors are state certified (BPPVE) to train and implement speech recognition. We have many different types of software licensing and training programs, including group training, to meet the needs and budgets of our clients. Zephyr-TEC works with many state agencies and corporations to return disabled individuals to their computer jobs and help minimize or prevent losses due to repetitive stress injuries. We offer competitive pricing, provide excellent training and support services and train throughout the state of California. We also have training centers in Rancho Cucamonga, Ventura, and Concord.
